INFORMATION

ABOUT SMART CURTAIN

THE SMART CURTAIN is a hybrid product with the soft and cozy mood of curtains and the refined and convenient features of vertical blinds, made up for the shortcomings of curtains and vertical blinds. The fabric consisting of high-quality knitted fabric and mesh parts is not made up of a one fabric like a curtain, but each 41cm wide fabric is made of independent slat. Each slat moves only through the rail at the top, so it is very light than the existing curtain and can be adjusted very simply by operating the handle rod.

In addition, since the separated fabric is not connected like a vertical blind, it is possible to create space such as separating space and blocking the view by moving as many slats as you want. Unlike the cold and sharp image of the vertical blind, this product is a curved, voluminous fabric structure that fits well with all spaces in the home and office.

Easy operation using handle rod

Turning the 'handle rod' 180° left and right

Turning the 'handle rod' 180° left and right

You can easily adjust the angle of each slat by turning the 'handle rod' 180° left and right. Each slat consists of mesh and fabric, so it is possible to adjust the external field of view while the SMART CURTAIN is closed.

Free view, free design

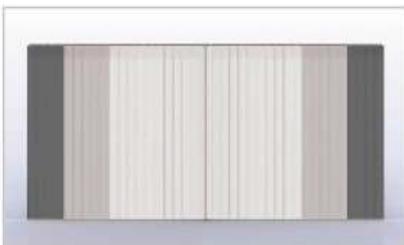

Open on both sides

External visibility with curtain closed

Adjustment of handle rod to block the view

Design change of each detachable slat

Biggest advantage of SMART CURTAIN is that it is possible to adjust the field of view and change the design partially as desired. The entire fabric can be moved to both or one side, and open view and privacy can also be selected in a closed state. Detachable independent slats are the most effective items for management, such as design changes and partial laundry, and will help you create an economical and imagined design.

DETAIL

TECHNICAL PROPERTIES

Composition	Polyester 100%
Packing	50m/Roll (±5m)
Other Features	F/R or NON F/R ANTIBACTERIAL
Solar reflectance	Woven_56.8, Mesh_13.7
Solar absorbance	Woven_31.6, Mesh_16.5
Solar transmittance	Woven_11.6, Mesh_69.8
Ultra violet blocking	UV-R : 99.1%, UV-A : 98.9%, UV-B : 99.4%
Ultra violet protection factor	50+, UV-A : 1.1%, UV-B : 0.6%

Colorfastness	Washing	Crocking	Perspiration	Light
	NATURAL. D	4.5 - 5	4.5 - 5	4.5 - 5
NORMAL	3 - 4	3 - 4	3 - 4	3 - 3.5

COLOR

Color sample may not necessarily be an exact match of the material to be used to produce your order. Return will not be accepted due to minor variations of color or textile.
